BAG AND SIZE LIMITS

- The size of fish shall be measured in a straight line from the tip of the snout to the extreme end of the tail.
- All fish that are landed must have head and tail intact such that it can be established whether the fish conforms to the minimum size limits, provided that it may be gutted.
- Special note should be taken of the size, bag and area limitations with regards to **Kob.**
- Species not mentioned in this list have a bag limit of ten, provided that sharks, rays, skates or chimaeras have a bag limit of one and Rockcods have a bag limit of five.
- There is an overall cumulative daily bag limit of 10, irrespective of the species caught and provided that this limit does not apply to those species listed here with no bag limit, and to those with a bag limit exceeding 10.

Common Name	Size cm/Mass	Bag Limit
